

SCION ALPINE NAVIGATION INTERFACE KIT

PRODIGY ONE

BY DIRECTUS™

SCION VEHICLES

SCION Alpine Premium Audio 4.3 Radios

Works with all 4.3 screen SCION Alpine Radios

*Navigation ready radios only

MAIN HMI

NAVIGATION

INTERNET BROWSER**

BLUETOOTH INTERFACE*

RADAR*

BACKUP CAMERA*

SYSTEM FEATURES:

The SCION Alpine Touch Screen Integration Kit allows for users with an OEM SCION Alpine Nav ready system in their current vehicles the ability to add navigation and more without replacing the factory radio. With the Prodigy One system as the base platform, SCION owners can easily upgrade their current radio and add on many of the Directus plugin features as well. The intuitive touch-screen offers easy-to-see graphics that let you touch your way easily through various menus and options. You can utilize the built in media player on the display screen up front while you're parked, or connect a back seat monitor so your passengers can enjoy entertainment media while you're driving. The Prodigy One also has many expandable options including a back-up camera, so now you not only can customize your car but your radio as well.

NAVIGATION SOFTWARE

- Basic Features include: Smart Mapping & 3D Mapping with a proven engine of the highest caliber,
- Smart Keyboard, Smart History, Driver Alerts, Real Junctions and several optional capabilities.
- Mapping update portal through www.Naviextras.com
 - This site provides map, content and software updates for our customers from all around the world

The DIRECTUS Nav comes with a brief integrated tutorial slide-show which explains all the important features to first time users who have never tried GPS navigation before.

The DIRECTUS Nav smart keyboard speeds up the process of entering city and street names by offering the most likely matching choices based on previously used destinations and on city population sizes.

Further sophisticated route calculation – DIRECTUS Nav calculates not only fast, short, and economical route variants, but also easy-to-follow routes, which include fewer and simpler maneuvers, using main roads where possible.

Route overview – DIRECTUS NAV overview presents the route variants (fast, short, economical, and easy-to-follow) and their most important properties on a top-down map, and gives users freedom of choice. The smart history 'learns' the user's behavior and habits: It offers a ranked list with the most likely destinations based on the current GPS position and previous routes.

Emergency – The 'Where am I?' function helps users in emergency situations: This function specifies the current GPS position, and helps in locating nearby assistance, such as a police station, ambulance, break-down service, etc.

THIS SCION PRODIGY ONE KIT INCLUDES:

- Prodigy One System
- 4GB SD Card with DirectusNav
- Premium Navigation Software
- Speaker and Mounting Bracket
- Video RCA Cable
- Power Harness
- External GPS Antenna

OPTIONAL PLUGINS*

- Back-Up Cameras
- Bluetooth Kit
